

GENERAL DYNAMICS

Nicholas D. Chabraja
Chairman of the Board
and Chief Executive Officer

General Dynamics is pleased to support *Audubon's Dream Realized: Selections from "The Birds of America,"* celebrating the National Gallery of Art's outstanding collection of works by the American master, who rendered wildlife with power, grace, and beauty.

Audubon's "Birds of America" engravings are admired not only for their scientific exactness, but also for their vitality and keen sense of design. Created with incredible precision, they demonstrate Audubon's expertise as both an artist and an ornithologist. The result of years of work, Audubon's publication is the most impressive and successful folio of birds ever produced.

Through this sponsorship, we celebrate a great American whose life's work has inspired in generations a passion and appreciation for both art and nature. We hope that visitors from around the world will take great pleasure in this beautiful exhibition.

Sincerely,

A handwritten signature in black ink, reading "Nicholas D. Chabraja". The signature is fluid and cursive, with the first name "Nicholas" being more prominent and the last name "Chabraja" following in a similar style.
